

Topic: Creative vs. Critical Thinking: The Importance Of Switching Between The Two

Mr. L.D. Bharadwaj (*Teacher of Chemistry, Hi. Sec. Sec.*)

In the ever-evolving landscape of today's world, both **creative thinking** and **critical thinking** are vital skills that pave the path for success. But understanding the distinction between these two powerful modes of thought is crucial to harnessing their full potential.

Creative thinking .It's the engine that drives innovation and fuels progress. Imagine a scientist envisioning a new cure for a disease, or an artist crafting a masterpiece that evokes emotions. These are all examples of creative thinking at its finest.

Critical thinking, It's the filter that ensures ideas are sound, solutions are effective, and decisions are well-informed. we unlock a wealth of potential, enabling us to innovate, analyze, solve problems, and ultimately, make a positive impact on the world around us.

Those who have the deepest science of observation can have the highest form of vision.

- **Problem Solving:** Creative thinking can lead to innovative solutions, while critical thinking can help identify the best solution among many. Imagine brainstorming possible solutions to climate change. Both modes of thought are essential for tackling this complex challenge.
- **Decision Making:** Creative thinking can help generate new options, while critical thinking can help assess the risks and benefits of each option. Imagine a company deciding whether to launch a new product. Both modes of thought are needed to make the best decision possible. One of my personal favorites - The 7 Habits of Highly Effective People, Stephen Covey, states that - Seek first to understand, then to be understood. He highlights the importance of critical thinking in listening and understanding before expressing your own ideas, which is crucial for effective communication and collaboration.
- **Leadership:** Creative thinking can help leaders inspire and motivate their teams, while critical thinking can help them make sound decisions under pressure. Imagine a leader rallying their team during a crisis. They need both creativity and critical thinking to be effective. In the book - The 21 Irrefutable Laws of Leadership, John C. Maxwell, says that - The single biggest way to impact an organization is to focus on leadership development. This emphasizes the importance of fostering both creative and critical thinking skills within an organization for continuous growth and development
- Remember, the key is not to choose one over the other, but to cultivate a healthy balance between these two powerful modes of thought.

જો સફળ થવું હોય તો સફળ થયેલા વ્યક્તિની જેમ વિચારો

Topic:- Planning, application, Evaluation and follow-up work

Mrs. Shila Karmokar (*Supervisor Primary Sec.*)

STAGES OF LEARNING PROCESS

“Management is about arranging and telling. Leadership is about nurturing and enhancing.”

“Most of what we call management consists of making it difficult for people to get their work done.”

Planning:- Planning is the foundation of all management function. In education it involves teachers, making teaching and curricular decisions regarding what students has to learn and instructional decisions regarding the learning experiences to be provided in the classroom.

Application:- Apply in the classroom can refer to applied learning, active learning or educational applications.

Evaluation:- Classroom evaluation is a continuous process like small test and exams that involves assessing students learning progress and performance.

Follow up work:- Follow work that means counseling the students and called parents then also counseling the parents. It helps students use new knowledge and skills in their own environments.

“Management is doing things right; leadership is doing the right things”.

“The difference between something good and something great is attention to detail”

Topic : Multi Talented Persons

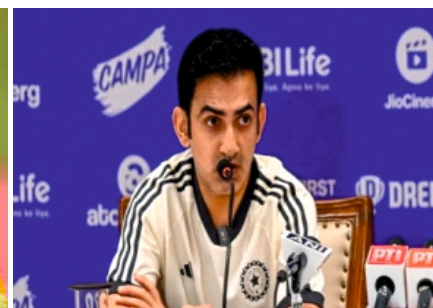

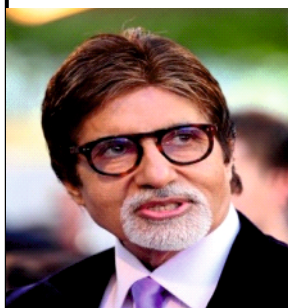

-Mrs. Unnatiben Patel
(*Supervisor*)

Meaning of Multi Talented Person : A person who has more than one special quality or skill. • Types of Multi Talented Person in different field/ professions :

- 1) **Multi Talented Actor** : Ex. Amitabh Bachchan is an Indian actor, former politician, playback singer, author, producer, and television host.
- 2) **Multi Talented Cricketer** : Ex. Gautam Gambhir is an Indian former international cricketer, former politician, commentator, and head coach of Indian cricket team.
- 3) **Multi Talented Athlete** : Ex. Neeraj Chopra is an Indian track and field athlete. He began his career by playing Cricket and Volleyball. Than after he switch his career in Javelin Throw.

4) **Multi Talented Teacher** :Ex. Vikash Divyakriti is a former Civil Servant, Educator, Author, Entrepreneur and lecturer. The above example implies that all the teachers of Narayan Vidyalaya also have multi-talented personalities.

Being quicker and more efficient throughout the working day increases our performance and the number of tasks completed. Higher productivity. If the tasks to be done are organised and carried out correctly, the volume of work that can be taken on increases. Better reaction to complex tasks.

Topic: Inclusive Education

**-Miss. Purava Prajapati
(Assistant Teacher)**

Inclusive education is the most effective way to give all children a fair chance to go to school, learn and develop the skills they need to thrive. Inclusive education means all children in the same classrooms, in the same schools. It means real learning opportunities for groups who have traditionally been excluded – not only children with disabilities, but speakers of minority languages too.

Inclusive systems value the unique contributions students of all backgrounds bring to the classroom and allow diverse groups to grow side by side, to the benefit of all.

At the school level, teachers must be trained, buildings must be refurbished and students must receive accessible learning materials. At the community level, stigma and discrimination must be tackled and individuals need to be educated on the benefit of inclusive education. At the national level, Governments must align laws and policies with the Convention on the Rights of Persons with Disabilities, and regularly collect and analyses data to ensure children are reached with effective service

“An investment in knowledge pays the best interest.”

“If they can't learn the way we teach, We teach the way they learn”
